

**EMUGE
FRANKEN**

Milling Demo Kit

Included in Kit:

HSK63, BT30 and BT40 are available.

CAT40 / FPC20 x 62 – Holder

1/2" Top-Cut VAR 6 Flute – Rad 0.03

1/2" TiNox-Cut – Coolant – 4 Flute – HB

1/2" – FPC20 – Collet

▲ Top-Cut VAR

EMUGE-FRANKEN quality stands out in everyday applications with the popular Top-Cut VAR line of end mills in fractional inch sizes. Top-Cut VAR tools are an economical and versatile end mill made from premium solid micro-grain carbide which can be used in nearly all materials and milling strategies due to their special geometry properties.

1/2" TiNox-Cut – 5 Flute – Rad 0.12

▶ TiNox-Cut

The TiNox-Cut series was especially developed for machining titanium alloys (Type N), nickel base alloys (Type NF) and stainless steel (Base style). This product range consists of sub-micro grain carbide end mills combined with specialized PVD coatings for high temperature applications. Coolant fed options are available as standard product for the most demanding applications. Long finisher profile styles with a flute length/diameter ratio of max. 4:1 are available for finishing of difficult to cut aerospace materials.

1/2" TiNox-Cut – Trochoidal 3xD Rad 0.030

▲ FPC Tool Holding System

EMUGE high precision / performance FPC Mill / Drill Chucks provide unprecedented rigidity, vibration dampening, concentricity, machining speed and tool life vs. conventional chuck technologies for milling and drilling applications. Available in a wide range of styles. Internal or peripheral coolant options, and MQL-adaptable.
